

Success Story: Greenfield SIEM and UEBA solution deployment with automation capabilities for German Wholesale company

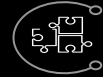

Challenges

- Need for deployment of SIEM solution with 24x7 Monitoring for cyber threats
- Ability to engage immediately in incident response along with automation
- Protection against advanced attacks and insider threats

Proposed Solution

- Greenfield deployment of SOC/SIEM solution
- 15,000 EPS volume with integration covering GCP, Oracle Cloud, Data Centers and SAP systems
- Hybrid SOC services delivered from Germany and India – detection, triage, incident response services, content development, platform administration
- SOC and Incident management processes definition

Expected Benefits

- 24x7x365 security monitoring with Incident Response and Threat hunting services
- Opex based pricing model with no upfront investment
- Outcome based service delivery with defined SLA's and reported KPI metrics
- Threat advisories on scheduled and ad-hoc basis

Current State

- Wipro has started with Project execution and are in planning and design phase
