

# Security Management Center (SMC)

Identify and prioritize operational security risks

## Digital transformation increases operational risks

To accelerate digital transformation initiatives, and to equip employees to work, connect, and collaborate from anywhere, enterprises in all industries are adopting cutting-edge technologies, such as multi-cloud, edge computing and IoT.

But increased connectivity and technology means that many enterprises are facing limited visibility of the “security hygiene” necessary to secure their most critical business asset – data.

## Expanded risk and threat visibility across multi-cloud and hybrid networks

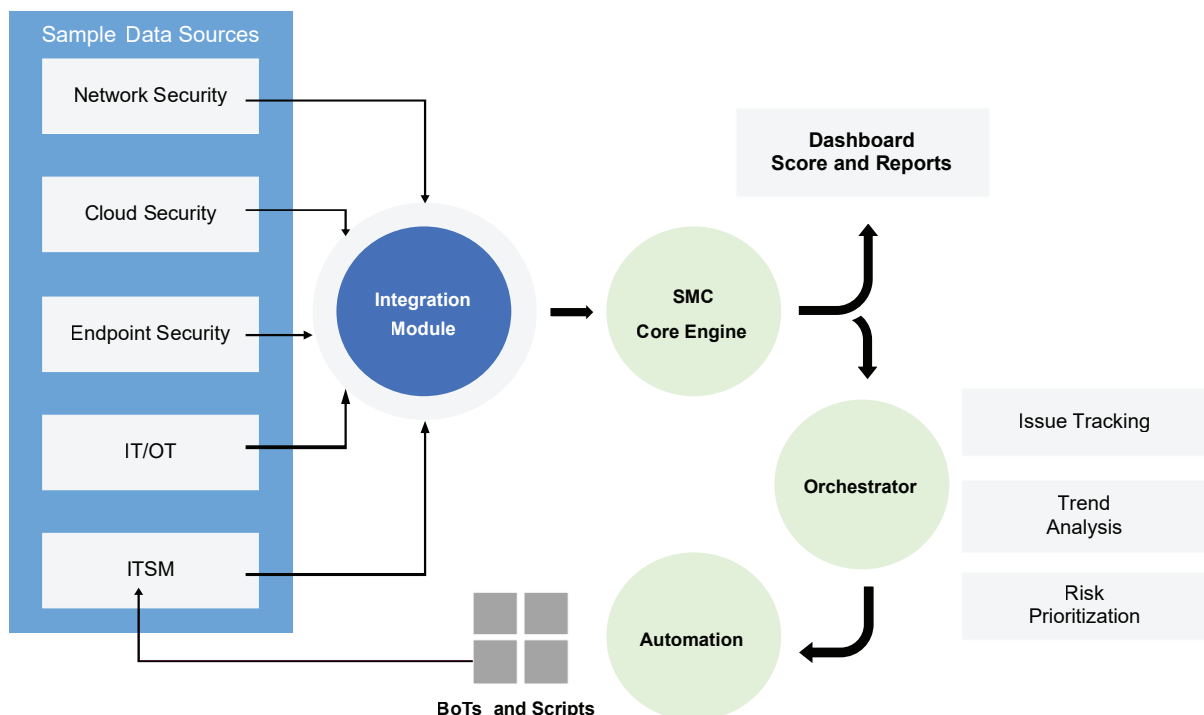

Wipro Security Management Center (SMC) platform helps connected enterprises secure their business operations and protect distributed data wherever it is located.

SMC offers an integrated security strategy approach to identify and prioritize cybersecurity gaps across the multi-cloud and hybrid networks, IT/OT and endpoints. This enhanced visibility provides a powerful defense that reduces vulnerabilities to sophisticated cyber threats.

Enterprises can also leverage **SMC Lite** for improvement and integration.

**Wipro Security Management Center optimizes your cybersecurity investments**

- 25% cost savings
- 40% decrease in manual labor
- 25 – 75% boost in operational effectiveness
- 70% reduction in transaction handling time

# Wipro Security Management Center values and outcomes

One of the largest manufacturing companies in Europe and a leading Telco in Asia implemented Wipro's Security Management Center to secure their business operations.

## Broad partner integration accelerates strategic security solution adoption

Wipro maintains strong partner relationships with top security technology providers to streamline SMC solution integration.
