

CLOUD SECURITY

Cloud Security Services

Security and compliance for multi-cloud applications and workloads

Enterprises face daunting cloud security challenges

The adoption of the public cloud as part of the digital transformation journey is a top enabler for organizations. However, many organizations fail to include sufficient security and compliance solutions in their initial cloud strategy. Challenges include:

- Ambiguous or lack of preventive and detective cloud security guardrails leading to breaches across applications, data and infrastructure
- Lack of granular risk and compliance visibility
- Unchecked or mismanaged identity policies creating access visibility issues
- A need for heightened security threat detection and response
- Complex hybrid cloud attack surfaces that require different security solutions
- Lack of “shift-left” process adoption leading to security gaps from code to infra

Wipro believes security and compliance must be a driving force behind cloud adoption to help enterprises quickly reach their business goals and take a full stride forward.

Wipro’s Cloud Security Benefits

- NIST based assessment of multi-cloud security posture & maturity along with actionable recommendations
- Visibility through a “single pane of glass” with application compliance status across multi-cloud through 1,200+ cloud security use cases
- Secure, rapid and efficient cloud adoption using cloud-based automation and standardized templates to drive your business strategy

Wipro’s end-to-end cloud security services

Wipro provides clients with comprehensive, outcome-based cloud security, plus risk management and governance services to protect multi-cloud business applications and workloads. We offer advisory, strategy, transformation, implementation and managed security services that enable our customers to adopt the right response model for potential risks in public clouds. Our solutions are powered and co-innovated with top cloud service and technology providers.

 Advisory and Strategy	 Transformation and Implementation	 Managed Services
<ul style="list-style-type: none"> • Cloud security strategy • Adoption playbook • Cloud security architecture • Cloud security posture Assessment 	<ul style="list-style-type: none"> • Accelerated secure cloud migration • Multi-cloud jump start • Security guardrails – native & third party • Application modernization security 	<ul style="list-style-type: none"> • Managed cloud-native security services • Managed application security & assurance • Managed threat detection & response

CSP-aligned Well Arch Framework, Regulations and Standards-based Frameworks

Zero Trust Security Architecture

Accelerators for rapid cloud strategy and implementation

Wipro offers accelerators and tools across the full breadth of IP to build and enrich your cloud security posture.

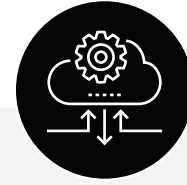

Cloud Application Risk Governance (CARG)

A Wipro IP that provides a holistic view of security posture and risk exposure through a “single pane of glass” along with application compliance status across the multi-cloud through 1200+ cloud security use cases.

Cloud Security Posture Assessment (CSPA)

NIST-based assessment using tools and the Wipro CARG Lite solution with 200+ custom libraries for cloud security best practices and alignment with hyperscalers’ well-architected frameworks.

Secure Cloud Foundation

Automation and accelerators to build and enhance cloud foundation security with 800+ preventive and detective guardrails along with compliance and architectural frameworks.

Industry recognition

Wipro was positioned as a Leader in the IDC MarketScape for Worldwide Managed Cloud Security Services 2022

Wipro’s CARG and SMC platforms won Globee’s IT World Award for Cloud and Cyber Security

Wipro won Palo Alto’s 2021 EMEA Partner of the Year award

Wipro won Zscaler’s Americas SI Partner of the Year awards in 2021
