

CRITICAL INCIDENT RESPONSE SERVICES

Wipro's IRaaS Incident Response-as-a-Service

Detect and respond to breaches at the earliest stages

Is your incident response plan a sturdy lock or a welcome mat?

In today's fast-paced digital world, threats can strike at any time, making robust software security a necessity. When an attack occurs, the enterprise needs to quickly identify the scope of the breach and rapidly move into triage mode to implement remediation strategies. Many organizations lack the internal resources to efficiently and effectively perform these functions around the clock.

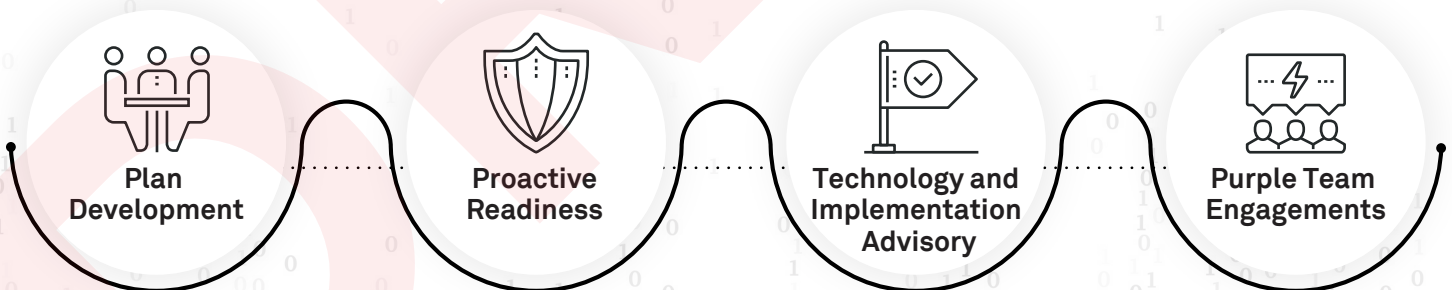

Wipro's 24/7 threat detection and response

Wipro's IRaaS — Incident Response-as-a-Service — provides 24/7 comprehensive threat detection and response. Our tailored remediation strategies offer critical guidance in your decision-making process throughout the incident lifecycle.

Wipro is a proactive, strategic partner dedicated to safeguarding your digital presence. We don't just react. We anticipate. Our IRaaS includes deep insight into the cyber threat landscape, allowing us to detect breaches at their earliest stage.

Do you have an IR Retainer?

We can help bridge the gap between expensive IR response and proactive engagements with our experts. Wipro's IRaaS can be customized to your organization's specific needs – from 'Call an Expert' to advanced threat analysis and response.

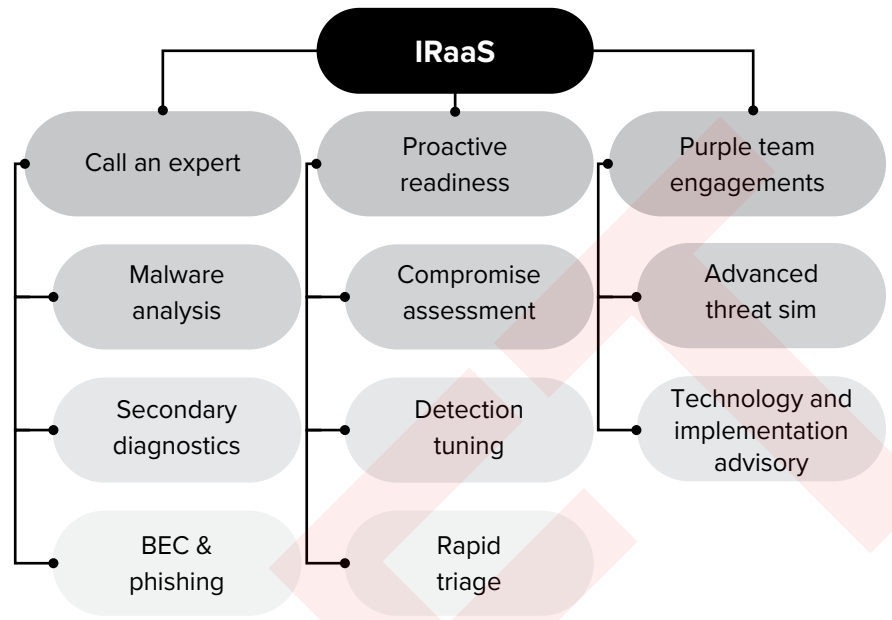

Experience is the Wipro difference

Is your security up to the task of defending against modern threats? Our skilled team performs detailed malware analysis and forensics — both on hosts and on your network — delivering high-fidelity findings. This proactive approach increases efficiency in handling even minor incident response remediation processes.

Our IRaaS Cybersecurists have decades of law enforcement and private sector experience in handling all major business threats, including:

- Ransomware
- APT and nation-state threat actors
- Malware analysis
- Business email compromise and phishing attacks
- Insider threats
